ArtEcon

Course Selection Roadmap

Practical BIM and digital construction training for architects and engineers. Use this guide to compare the programs, curriculum, fees, and learning format.

BIM Fundamentals

Foundation | 60 Days | INR 30,000

Build your foundation in Revit, Navisworks and digital construction.

- Revit Architecture & Structure
- Intro to Navisworks
- Intro to BIM 360
- Live Project & Internship

Outcome: By course completion, students can independently create basic BIM models and understand core digital construction workflows used across the AEC industry.

BIM Intermediate

Intermediate | 90 Days | INR 45,000

Develop coordinated models across architecture, structure, and MEP.

- Revit Architecture, Structure & MEP
- Navisworks Manage
- BIM 360 (full suite)
- Live Project & Internship
- Dedicated Mentoring Support

Outcome: Ability to work on coordinated BIM models across disciplines.

BIM Picasso

Advanced | 180 Days | INR 60,000

Follow the complete BIM workflow, from modeling to 4D and 5D planning.

- Revit (Architecture, Structure & MEP)
- Navisworks Manage
- BIM 360 (full suite)
- MS Project & Bexel Manager
- Advanced 1-on-1 Mentoring
- Live Projects & Internship
- Placement Assistance

Outcome: Prepared for roles such as BIM Engineer, BIM Modeler, and BIM Coordinator.

Learning Format

Live online classes, Monday to Friday, one hour per session.

Evening slots: 8:30-9:30 PM or 9:30-10:30 PM IST. Contact the team for current batch availability.

Session recordings, practical projects, software setup support, and a certificate of completion. Instalment options are available.

Choose Your Next Step

New to BIM? Start with Fundamentals. For multidisciplinary coordination, explore Intermediate. For the complete BIM workflow and placement assistance, consider Picasso.
